RE: Notification of Nutritional Support Statements

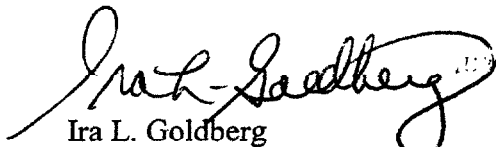

To whom it may concern:

I hereby notify the Food and Drug Administration (FDA) of the use of statements of nutritional support in the labeling of GliSODin®Power a dietary supplement. Source Naturals® is the manufacturer of GliSODin®Power.

Statements being made in the labeling of GliSODin®Power

- 1) GliSODin®Power is an innovative bioavailable form of superoxide dismutase (SOD), the most important enzyme in the body responsible for protecting the body's cells and tissues from free radical damage.
- 2) Scientific research shows that GliSODin® supports the body's own production of superoxide dismutase.
- 3) GliSODin®Power is 100% vegetarian and is comprised of gliadin, a wheat protein extract, which is bound to superoxide dismutase derived from cantaloupe.
- 4) The gliadin protects the SOD from degradation in the digestive tract and also promotes its absorption.

To the best of my knowledge and belief, and based upon information available at the time of the execution of this notice, I certify that the above information is accurate and complete. Source Naturals® possesses substantiation that the statements are truthful and not misleading.

  
Ira L. Goldberg
